

FACT SHEET

Ethics Program Internal Review

DESCRIPTION

BPA conducted an internal audit of its ethics program. The audit compared BPA's program to best practices under the U. S. Sentencing Commission's Federal Sentencing Guidelines manual. While the audit concluded that BPA has implemented an effective ethics program, the audit identified three areas for improving. The agency is currently considering how to implement the recommendations.

PURPOSE

The Ethics audit was used to compare the existing program to best practices and recommend actions that move the program to a higher level.

PRODUCT ADAPTABILITY

Any agency can conduct an internal program review using similar established guidelines.
