	DESCRIPTION/SPONSOR/DATES		SOURCE	DESCRIPTION	CHECK	IN-KIND	AMOUNT
NAME Robert Burgess	DESCRIPTION Dr. Burgess will serve as a member of the Stakeholder Board of the European Union funded SOLUTIONS project for the 3rd General Assembly. In this role, he will provide constructive comments on how the project is functioning and give an outsider's perspective on the project's development and progress. The Stakeholder Board is constituted of experts from around the world who are interested in the results of the SOLUTIONS project in terms of the scientific and technological findings. The invitation e-mail and meeting itinerary are attached. Further, this travel will serve as an opportunity for Dr. Burgess to meet with scientists from around Europe, China, Australia and Brazil, all with a specific interest in understanding how to identify contaminants that are adversely affecting the ecological and human health and sustainability of natural waters. This travel advances U.S. EPA's Office of International and Tribal Affairs (OITA) International Priorities in the following areas: (1) Expanding Access to Clean Water, (2) Reducing Exposure to Toxic Chemicals, and (3) Building Strong Environmental Institutions and Legal Structures. Further, without this mission critical travel, key ORD deliverables to the Program Offices (e.g., OSWER, OW, OCSPP) under ORD's research planning process could be delayed. The travel also contributes to U.S. foreign policy objectives with Europe, a region considered a key strategic partner under the IMPLEMENTING ARRANGEMENT between the European Commission and the U.S. EPA to Promote Cooperation on Environmental Research and Ecoinformatics as	LOCATION Brezno area - Slovakia	UFZ Helmholtz Centre for Environmental Research GmbH	Common carrier transportation Meals Lodging Local transportation	X X X X	X X	\$1900 \$160 \$876 \$27

specifically described in the 2007 Science and Technology Agreement managed by the Department of State. Further, the travel contributes directly to achieving key accomplishments in a program (i.e., the SOLUTIONS project) which depends on critical U.S. EPA participation in an advisory role. Specifically, the travel is being performed in order for European and U.S. EPA scientists to gain a better understanding of which emerging contaminants represent the greatest environmental risks in the aquatic environment.

The SOLUTIONS project brings together experts from Europe, South America, China and Australia and North America to discuss methods for monitoring the presence of and determining the environmental behavior and toxicological effects of conventional and emerging chemicals entering aquatic systems. Many of the emerging contaminants under consideration are of direct interest to the objectives of the U.S. EPA's ORD Safe and Sustainable Water Resources (SSWR) research program. Since the late 1990s, the presence of emerging contaminants in the waters of the United States has been recognized as a source of risk to human and ecological health as well as a source of uncertainty to the continued sustainability of these waters. Topics covered in this meeting are most relevant to the following components of the current SSWR research program: 3.02 Science to Support New or Revised Water Quality Criteria to Protect Human Health and Aquatic Life; Task 3.02C Development of innovative advanced tools and technologies to identify and quantify exposure to and/or effects of chemical and microbial contaminants including those of emerging concern for future human health and aquatic life criteria.

Most of the travel costs are being paid for by the Germany government's research facility, the UFZ Helmholtz Centre for Environmental Research GmbH (a member of the SOLUTIONS research team). This funding is from a European Union research grant. Specifically, flights, lodging, local transportation, and most meals will be paid for by SOLUTIONS funding via the UFZ Helmholtz Centre for Environmental Research GmbH. Cost to AED are estimated to be approximately \$450.00.

"In cash" reimbursement (see below) will involve Dr. Burgess providing a contact person in the U.S. EPA travel office with Dr. David López Herráez' (UFZ Helmholtz Centre for Environmental Research GmbH) contact information. After the travel has occurred, Dr. Herráez will be requested by the travel office to transfer the reimbursement directly to the Agency travel account. Dr. Burgess will have already been reimbursed by the Agency's for his travel costs.

NAME Claire Schary	DESCRIPTION A conference about active watershed assessment and restoration and mitigation programs for NPDES compliance and 401/FERC relicensing, with a focus on nutrient and temperature reduction benefits. They requested my participation the panel to discuss the successful implementation of regional policy for water quality trading in Region 10. The Freshwater Trust says the feedback they have received from the people they are talking to in California, including the Water Board, is that they'd like to hear about good examples from outside their state. I am attaching an email that contains a draft agenda. It has a type that identifies me as from Region 9, but they are aware that I am from REgion 10, along with Alan Henning, who is also invited to speak and will be submitting a separate ethics form. NAME Susan Stone	DESCRIPTION The goal of this workshop is to define a roadmap towards development of a national smoke warning system. To that end, they wish to identify barriers (financial, scientific, logistical) that currently exist. For this workshop, they are aiming to have discussions with stakeholders who can make decisions (not scientists who study the problem). The task of smoke exposure warning is being undertaken in parts by various agencies but a national system is a goal that would require a lot more commitment, coordination, and effort. The partnership at CSU is interested in facilitating the process towards such a goal and would greatly value my participation at this workshop. My experience in advisory systems (AQI and AirNow) would be invaluable. They are also inviting private sector involvement (Mary Glackin of Weather Company and Bill Gail of Global Weather Corp are coming) to deploy a national system in addition to government. Other agencies that are involved are NOAA, CDC, Forest Service, JSFP, Military, and EPA. My expertise in the science as well as translating that science to use will bring a unique and important perspective to this workshop.
