Kevin Crofton	<p>This workshop is intended to extend the scope of use of Adverse Outcome Pathway (AOP) based activities, and to help ensure that scientists see all possibilities to work across the traditional boundaries that have existed between regulatory toxicology and health research.</p> <p>Experts from five different medical research fields will identify opportunities for progress through a new, 21st-century paradigm for research, based on the growing toolbox of human-specific models and technologies (including clinical and population research, the 'omics, 3D human cell cultures, human stem cells, microfluidics, computational modelling, systems biology). The Humane Society International is particularly interested in pathways-based approaches at multiple biological scales (e.g. molecular, cell, organ, organism), and invited Dr. Crofton because of his understanding in combining these types of approaches, and his experience in sharing knowledge relevant to both biomedicine and toxicology.</p>	<p>Crowne Plaza Brussels, rue Gineste 3 Brussels, 1210 Belgium</p>	<p>Meals X \$262</p> <p>Lodging X \$500</p> <p>Local transportation X \$100</p> <p>Other: Train to Brussels from Amsterdam and other misc. fees X \$130</p>

NAME Kevin Crofton	<p>DESCRIPTION DENAMIC "Developmental Neurotoxicity Assessment of Mixtures in Children" is an EU funded research program that investigates neurotoxic effects of low-concentration mixtures of pesticides and a number of common environmental pollutants in children (see attached DENAMIC Flyer). The main objective of the workshop is to bring together people that are working in the field of chemical exposure, developmental neurotoxicity, biomarkers, epidemiological neurodevelopment, and risk assessment. The workshop will focus on tools and methods for screening of neurotoxic effects, but also on (subclinical) effects on learning (cognitive skills) and developmental disorders in children (e.g. ADHD, autism spectrum disorders). Another topic is the use of biomarkers in the field of (developmental) neurotoxicity. The workshop will also present and discuss findings obtained by the European Union funded project DENAMIC, which investigates neurotoxic effects of low-concentration mixtures of pesticides and a number of common environmental pollutants in children.</p>	<p>LOCATION NETHERLANDS - AMSTERDAM</p>	<p>VU University, Institute for Environmental Studies (IVM in Amsterdam</p>	<p>Common carrier transportation X \$2000</p> <p>Meals X \$616.50</p> <p>Lodging X \$850</p> <p>Other: Misc.: parking, mileage home to airport and return and ground transportation X \$295</p>		

	DENAMIC partners and guest speakers will discuss: - tools and methods for (developmental) neurotoxicity testing - experimental and epidemiological neurodevelopmental studies - human risk assessment for developmental neurotoxicity socioeconomic impact of neurodevelopmental disorders

communities we serve. At the request of the California State Fire Marshal's Office, OEM RID staff was asked to participate in the CUPA training forum and conference in Feb. RID staff served as a lead short course instructor, a platform presenter and panelist during the CUPA training forum. RID staff have been working with staff from the Fire Marshal's office to provide training that fosters consistency between the Federal SPCC program and State AST program, as required by California State law. This ongoing and highly successful partnership with the California State Fire Marshal's Office and local CUPAs had resulted in OEM RID staff training CUPA inspection staff, regular consultation on interpretive consistency, and webinar training events. Additionally, OEM staff will provide inspector training in the late summer so that all CUPA inspectors (several hundred) will have attended EPA's Oil SPCC Inspector Training Course. The California State Fire Marshal's Office and CUPAs have expressed their appreciation for EPA's assistance relative to implementing the State program consistently with the Federal SPCC program.

NAME Thomas Knudsen	DESCRIPTION Systems Toxicology 2016 - his meeting aims to explore current and likely future specific applications of systems toxicology approaches in chemical risk evaluation. The objectives of this conference are three-fold: 1. Discuss real-world examples of how systems toxicology can be applied to elucidate toxic modes of action and influence realistic exposure and biological impact assessments. 2. Learn how experimental and computational elements can be integrated in systems toxicology-based approaches. 3. Reveal recent advances in complementary and multidisciplinary research areas with the potential to enhance further development and application of Systems Toxicology. NAME Dino Marshalonis	<p>DESCRIPTION</p> <p>Funded by the Environmental Protection Agency (EPA), Urban Greening Bay Area is a collaborative effort between San Francisco Estuary Partnership (SFEP), San Francisco Estuary Institute (SFEI), Bay Area Stormwater Management Agencies Association (BASMAA), and selected Bay Area municipalities. The goals of the project are to explore upgrades to the existing GI toolkit that will help Bay Area municipalities to identify the optimal combination of Green Infrastructure (GI) features for achieving desirable environmental outcomes at a watershed scale, develop a GI Tracker tool in one pilot city area that documents GI implementation throughout the region, and apply the toolkit with five municipal partners.</p> <p>The GI toolkit, aka GreenPlan-IT, includes three components: a GIS site locator tool with user interface to determine site suitability, a watershed modeling package (SWMM and SUSTAIN) to identify high-yield runoff and pollutant areas ('hot spot') and quantify flow or pollutant reductions from GIS, and optimization techniques to search for optimal combinations of GI locations, types and configurations to meet management reduction goals. GreenPlan-IT produces outputs that include tables, GIS maps, and prioritized lists of locations based on optimization curves and stakeholder inputs. GreenPlan-IT will be implemented in five additional municipalities/ watersheds during the project term. The results of Green-Plan-IT will serve as the basis for municipal Green Infrastructure Master Plans and/or a list of priority GI sites for each jurisdiction with linkages to permit requirements called for in the Phase I Municipal Regional stormwater permit (MRP) soon to be reissued for the Bay Area in early 2016.</p> <p>Because of the technical nature of the toolkit and its designed use for addressing permit requirements, a technical advisory team (TAC) will be convened and engaged to provide input on lessons learned from other similar efforts, as well as to offer advice and review on specific scientific,</p>	<p>LOCATION</p> <p>San Francisco, CA</p>	<p>SOURCE</p> <p>San Francisco Estuary Institute (SFEI)</p>	<p>DESCRIPTION</p> <p>Common carrier transportation</p>		X	\$283.20

	<p>technological, and permit related issues during the toolkit upgrades and development of the Tracker tool.</p> <p>SFEI is planning to hold in person and phone conference TAC meetings. Additional one-on-one phone calls and emails may also occur during the project.</p> <p>Two face-to-face "all-day" meetings are anticipated. TAC members can call in using videoconferencing technology if necessary. The first is slated for February 2016 and the second is slated more conceptually for autumn 2016 or early 2017. Ideally meeting delegates will do <2 hours pre-meeting materials review and provide <2 page summary of any meeting notes or post-meeting reflections via email.</p> <p>EPA employee Dino Marshalonis is not responsible for evaluating performance of grants administration for this grantee.</p> <p>Funding for this travel will come from SFEI unencumbered funds, so it isn't federal grant funding or match for a federal project.</p>

NAME Russell Thomas	DESCRIPTION Systems Toxicology 2016 - Real World Applications and Opportunities" This meeting aims to explore current and likely future specific applications of systems toxicology approaches in chemical risk evaluation. The objectives of this conference are three-fold: 1. Discuss real-world examples of how systems toxicology can be applied to elucidate toxic modes of action and influence realistic exposure and biological impact assessments. 2. Learn how experimental and computational elements can be integrated in systems toxicology-based approaches. 3. Reveal recent advances in complementary and multidisciplinary research areas with the potential to enhance further development and application of Systems Toxicology.
