October 30, 2003

The Honorable C.W. Young
Chairman
Committee on Appropriations
United States House of Representatives
H-218, The Capitol
Washington, DC 20515-6015

Dear Mr. Chairman:

Pursuant to 44 U.S.C. § 3544 (c), enclosed is the annual information technology security review for the U.S. Office of Government Ethics (OGE).

The Information Technology Group of the Bureau of Public Debt, Department of the Treasury, recently conducted a comprehensive Facilitated Information Technology Security Review (FITSR) of OGE's systems. The purpose of that independent review was to identify the risks and security weaknesses that we should consider in accrediting our General Support System and our Major Application.

Although no major problems were identified in the FITSR, a number of minor issues were brought to our attention. Accordingly, we developed a mitigation plan to address those weaknesses identified in the FITSR process. Our goal is to correct those deficiencies and achieve full certification and accreditation of our systems by December 5, 2003. Enclosed for your information are our Plans of Actions and Milestones for our information technology security program, as well as for our General Support System and Major Application.

Please be assured that OGE is committed to maintaining an information technology security program that adequately protects the confidentiality, integrity, and availability of our systems and data. We would like to note that we have invested a
significant quantity of time and effort to design, configure, implement, and test a more secure OGE network architecture.

If you have any additional questions, please feel free to contact me or Daniel D. Dunning, Chief Information Officer, at 202-482-9203.

Sincerely,

Amy L. Comstock
