Subject: Proposed Amendments to Part 2635"

Date: Tuesday, September 27, 2011 6:44:22 PM

As a concerned citizen I oppose any weakening of the Standards of Ethical Conduct for Employees of the Executive Branch, and find the arguments of those proposing the amendments to be disingenuous.

I believe that many citizens think that Lobbyists and Lobbying Organizations have far too much influence in Washington and that limiting gifts is a modest and reasonable measure. Amending this rule will send a message to the American people that institutionalize graft and corruption is officially approved by the United States Office of Government Ethics.
