Robert Burgess	This travel advances U.S. EPA's Office of International and Tribal Affairs (OITA) International Priorities in the following areas: (1) Expanding Access to Clean Water, (2) Reducing Exposure to Toxic Chemicals, and (3) Building Strong Environmental Institutions and Legal Structures. Further, without this mission critical travel, key ORD deliverables to the Program Offices (e.g., OSWER, OW) under ORD's Path Forward research planning process will be delayed. The travel also contributes to U.S. foreign policy objectives with Europe, a region considered a key strategic partner under the IMPLEMENTING ARRANGEMENT between the European Commission and the U.S. EPA to Promote Cooperation on Environmental Research and Ecoinformatics as specifically described in the 2007 Science and Technology Agreement managed by the Department of State. Specifically, the travel is being performed in order for European and U.S. EPA scientists to gain a better understanding of which emerging contaminants represent the greatest environmental risks as well as to assess the use of passive sampling to monitor these contaminants in the aquatic environment. The majority of this travel is being funded by the NORMAN EXPERT GROUP. Specifically, the NORMAN EXPERT GROUP will cover flights, housing, most meals and local transport. U.S. EPA will cover TMC, personal phone calls, TAV, some meals and mileage (~ \$150).	CZECH REPUBLIC - BRNO	Meals	X		\$77.96

NAME Dan Campbell	<p>DESCRIPTION</p> <p>The stated purpose of the event is to promote "healthy and viable river ecosystems" and the purpose of the special session on Environmental Accounting and Management is to bring everyone up to date on events in this rapidly changing field of research. This travel advances U.S. EPA's Office of International and Tribal Affairs (OITA) International Priorities primarily by (1) Building Strong Environmental Institutions and Legal Structures. However, because of the comprehensive accounting approach that Campbell is developing, potentially all of the other international priority activities, i.e., improving air and water quality, reducing exposure to toxic chemicals, cleaning-up e-waste will be supported by the development of a means to accurately account for the environmental, economic and social costs and benefits associated with alternate management strategies. This travel will also contribute to completing our work within the Safe and Healthy Communities (SHC) task entitled "Uncertainty, Scalability and Transferability of Ecosystem Goods & Services", SHC 452. The possibility of promoting further development of Environmental Accounting using Emergy in P.R. China might shift some of the R&D costs to China's rapidly growing intellectual capacity and eventually lead to faster testing and application of these methods, which once accepted may lead to an improvement in the ability to assess a true triple bottom-line for all U.S. constituencies. This trip will also contribute to the stated foreign policy objectives of the U.S. and China as illustrated by the joint statement of President Obama and the former President of China Hu Jintao made on January 11, 2011, which proclaimed their shared commitment to a "positive, cooperative U.S.-China relationship".</p>	<p>LOCATION</p> <p>CHINA - BEIJING</p>	<p>State Key Joint Laboratory of Environmental Simulation and Pollution Control, School of Environment, Beijing Normal University</p>	<p>Common carrier transportation</p> <p>Meals</p> <p>Lodging</p> <p>Local transportation</p> <p>Waiver of fees</p>		<p>X</p> <p>X</p> <p>X</p> <p>X</p> <p>X</p>	<p>\$3037</p> <p>\$250</p> <p>\$400</p> <p>\$100</p> <p>\$500</p>

NAME Ginger Moser	DESCRIPTION Bi-annual meeting of the International Neurotoxicology Association. Several topics of the meeting are of critical importance to the Agency for improving human health risk assessments. These include developmental basis of health and disease, developmental neurotoxicity, and alternative neurotoxicity testing. The meeting will provide the opportunity to hear new findings in these areas, which can be applied to ongoing research within NHEERL, as well as foster interactions with experts in other countries working on the same issues. The topic of Dr Moser's symposium is non-cholinesterase mechanisms of pesticide-induced developmental neurotoxicity, which is a topic of great interest to the Program Offices and was discussed at an SAP on chlorpyrifos in April 2012. Her presentation will review the literature and propose several potential alternative mechanisms. 			SOURCE	DESCRIPTION	CHECK	IN-KIND	AMOUNT
NAME Walt Tunnessen	DESCRIPTION The Biscuit and Cracker Manufacturing Association (BCMA) has invited Walt Tunnessen to present at their annual technical conference and have offered to cover travel expenses. Walt coordinates work with this sector for ENERGY STAR. BCMA is the national trade association for cookie and cracker bakers. Their annual Technical Meeting is focused on food manufacturing, safety, energy, and environmental issues. The meeting is a widely attended by companies in the industry.	LOCATION Kansas City, MO	Biscuit and Cracker Manufacturing Association (BCMA)	Common carrier transportation	X		\$320
				Meals		X	\$20
				Lodging		X	\$100
				Local transportation	X		\$50
				Other: GovTrip Fees	X		\$15

	<p>Walt's presentation would be focused on ENERGY STAR tools for the sector. ENERGY STAR has worked with the BCMA and its member companies since 2008 to develop an ENERGY STAR Plant ENERGY STAR Performance Indicator. ENERGY STAR for Industry's mission is to reduce greenhouse gas emissions by driving energy efficiency in targeted manufacturing sectors. To affect change within an industry as a voluntary program, ENERGY STAR must engage companies in these sectors and persuade them to use the ENERGY STAR tools. ENERGY STAR program's primary engagement with the cookie and cracker industry is through participation in BCMA meetings. The BCMA meeting provides the best opportunity for ENERGY STAR to directly engage companies in this sector which is made up of roughly 300 plants operated by 60 companies. The meeting also provides EPA with a cost effective means to provide technical assistance on new and current ENERGY STAR tools to a large portion of the industry. This type of assistance is necessary for ensuring that companies will use ENERGY STAR tools improve their efficiency and ultimately reduce their greenhouse gas emissions.</p>

NAME Walt Tunnessen	<p>DESCRIPTION The New Jersey Chapter of the International Society of Pharmaceutical Engineers (ISPE) has invited Walt Tunnessen to speak at its annual supplier showcase meeting and has offered to cover travel expenses. Travel expenses will be primarily a round trip train ticket. This will be a day trip.</p> <p>The ISPE is a non-profit professional society of engineers working in the pharmaceutical and health sciences sectors. The New Jersey ISPE is the largest chapter of the ISPE due to the high concentration of the pharma companies in the state and their annual supplier meeting is a major conference in the pharma manufacturing sector. The meeting combines education sessions with a large industry trade show. Walt has been asked to speak in the education track.</p> <p>For the past 10 years, ENERGY STAR for Industry</p>	<p>LOCATION East Rutherford, NJ</p>	<p>The New Jersey Chapter of the International Society of Pharmaceutical Engineers (ISPE)</p>	<p>Common carrier transportation</p> <p>Meals</p> <p>Local transportation</p> <p>Other: GovTrip fees</p>	<p>X</p> <p>X</p> <p>X</p>	<p>X</p>	<p>\$150</p> <p>\$20</p> <p>\$20</p> <p>\$19</p>

has worked to promote energy efficiency in the pharma sector. Walt Tunessen manages this work and recognized as an energy efficiency leader in the sector. The ENERGY STAR program has developed a variety of tools and resources for the sector. Participation in this meeting provides ENERGY STAR with the opportunity increase awareness of these tools to a boarder audience (than energy managers) within the sector. The meeting will be a well attended event and attendees will come from a variety of backgrounds and businesses within the pharma sector that ENERGY STAR does not normally reach.

	DESCRIPTION/SPONSOR/DATES		SOURCE	DESCRIPTION	CHECK	IN-KIND	AMOUNT
NAME David-C Wong	DESCRIPTION This meeting initiates a collaboration to enable the development of the GRAPES-CMAQ two-way modeling system, which would include the CMAQ model (an air quality model) that was developed by the Atmospheric Model and Analysis Division (AMAD) in NERL/ORD. The establishment of a collaborative relationship with researchers at the Institute of Tropical and Marine Meteorology (ITMM) will help in the conduct of a detailed GRAPES-CMAQ and WRF-CMAQ inter-model comparison as well as evaluation of EPA's new two-way coupled WRF-CMAQ modeling system, through application of the model to one of the world's most heavily industrialized and polluted areas (the Pearl River Delta region of China). The detailed comparison and evaluation will help identify the adequacies and inadequacies of the system, thereby providing guidance for further improvement of the modeling system that will yield for a more robust model to be used for EPA's policy guidance and assessment studies under the Clean Air Act. This new model will provide a better insight for scientists to study air quality as well as to find ways to improve it. The application of this new two-way WRF-CMAQ model to regions outside the Continental U.S. will not only promote its use and recognition throughout the world, but will also provide valuable scientific insights on the performance of the model for varying dynamical and chemical conditions, thereby providing guidance for further model based research.	LOCATION CHINA - GUANGZHOU	INSTITUTE OF TROPICAL AND MARINE METEOROLOGY (ITMM), China Meteorological Administration	Common carrier transportation Meals Lodging Local transportation		X X X X	\$1745 \$635 \$1000 \$200
